

EXPERIENCE

Senior UX/UI Designer - Finlark Technologies Full-time · Jan 2022 – May 2026 · Ahmedabad, India

Led end-to-end product design for 3+ concurrent products across 3 industries, including community events, franchise ordering, and inventory management, serving daily workflows for non-technical users.

Designed a scalable mobile event platform deployed across 16 events/cities, replacing spreadsheet and WhatsApp-based registration, booking, and permission workflows with structured digital experiences.

Designed group-based access, session booking, and configurable features, achieving 90% registration completion and a 70% reduction in support queries, with networking reaching 63% adoption.

Restructured complex dashboards and fragmented workflows into intuitive information architectures, while translating ambiguous stakeholder requirements into problem statements, user flows, and buildable product specs.

Built reusable Figma component libraries and design systems across 7+ products, collaborating with developers through Figma and Jira in Agile sprints to ensure consistent UX, accurate implementation, and efficient handoff.

UX/UI Designer - Clevbrain Technologies Pvt. Ltd. Full-time · Feb 2021 – Apr 2021 · Ahmedabad, India

Designed company websites and foundational UI systems, partnering closely with developers to ensure accurate implementation and consistent UX across platforms.

Established reusable visual patterns and component standards that maintained design consistency across product surfaces.

Worked across 2–3 simultaneous website projects, managing design priorities and developer communication independently with minimal oversight.

FREELANCE PROJECTS Independent Product Designer · Aug 2019 – Present · Ahmedabad (Remote-friendly)

Pharmacy E-Commerce Platform - Feb 2025

Designed a full digital experience for an independent pharmacy transitioning from offline to online - covering medicine ordering, prescription refills, and vaccination booking for delivery and in-store pickup.

Simplified complex, high-stakes healthcare flows to improve accessibility and reduce drop-off for first-time digital users.

Delivered measurable business growth: 4,600+ organic visitors per month, a 48% increase in prescription refill requests, and a 23% increase in vaccine bookings.

Market Insights - Hyper-local Decision Tool - Mar 2026

Designed a market intelligence product for first-time shop owners evaluating new locations, transforming fragmented inputs (footfall data, location signals, broker information) into structured, confidence-driving insights.

Replaced guesswork-driven market entry decisions with a clear, data-structured evaluation framework accessible to non-technical entrepreneurs.

Billbroz - Billing & Referral System - Jan 2026

Designed a lightweight billing and customer referral system for small shop owners, optimized for low-tech users through WhatsApp-first interactions and minimal cognitive overhead.

Reduced manual effort in daily sales tracking and customer referral management while preserving an intuitive experience for users with limited digital literacy.
