EXPERIENCE

Product Designer - Finlark Technologies Full-time · Jan 2022 – Present · Ahmedabad, India

Led end-to-end product design for 3+ concurrent client products across 3 industries - a community event app, a franchise ordering system, and an inventory management platform - each serving daily operational workflows for non-technical users.

Restructured complex, multi-step dashboards and fragmented workflows into intuitive information architectures, reducing task friction and improving clarity for operations-heavy user roles.

Built scalable, reusable Figma component libraries and design systems that standardized UI patterns across 3+ products and reduced design-to-development handoff iterations.

Collaborated with developers in Agile sprints using Figma and Jira to ensure pixel-accurate implementation, consistent cross-platform UX, and on-schedule delivery.

Drove product direction in ambiguous early-stage briefs — translating unclear stakeholder ideas into structured problem statements, user flows, and buildable product specs.

UX/UI Designer - Clevbrain Technologies Pvt. Ltd. Full-time · Feb 2021 – Apr 2021 · Ahmedabad, India

Designed company websites and foundational UI systems, partnering closely with developers to ensure accurate implementation and consistent UX across platforms.

Established reusable visual patterns and component standards that maintained design consistency across product surfaces.

Worked across 2–3 simultaneous website projects, managing design priorities and developer communication independently with minimal oversight.

FREELANCE PROJECTS Independent Product Designer · Aug 2019 – Present · Ahmedabad (Remote-friendly)

Pharmacy E-Commerce Platform - Feb 2025

Designed a full digital experience for an independent pharmacy transitioning from offline to online - covering medicine ordering, prescription refills, and vaccination booking for delivery and in-store pickup.

Simplified complex, high-stakes healthcare flows to improve accessibility and reduce drop-off for first-time digital users.

Delivered measurable business growth: 4,600+ organic visitors per month, a 48% increase in prescription refill requests, and a 23% increase in vaccine bookings.

Market Insights - Hyper-local Decision Tool - Mar 2026

Designed a market intelligence product for first-time shop owners evaluating new locations, transforming fragmented inputs (footfall data, location signals, broker information) into structured, confidence-driving insights.

Replaced guesswork-driven market entry decisions with a clear, data-structured evaluation framework accessible to non-technical entrepreneurs.

Billbroz - Billing & Referral System - Jan 2026

Designed a lightweight billing and customer referral system for small shop owners, optimised for low-tech users through WhatsApp-first interactions and minimal cognitive overhead.

Reduced manual effort in daily sales tracking and customer referral management while preserving an intuitive experience for users with limited digital literacy.

Skills

UX / Product Design

User Research, Wireframing, Prototyping, Interaction Design, Information Architecture, Design Systems, Usability Testing, Product Thinking

UI / Visual Design

High-Fidelity UI, Responsive Web Design, Mobile App Design, Component Libraries, Design Handoff

Tools

Figma, FigJam, Adobe XD, Whimsical, Jira, Basic HTML/CSS

Domains

E-commerce, Real Estate, Healthcare, Operations & Logistics, Retail & Small Business

Soft Skills

Product Direction, Stakeholder Alignment, Agile Collaboration, Developer Handoff, Client Management

Education

Bachelor of Computer Applications (BCA)

2017–2019 Shree Umiya BCA College, Ahmedabad

Graphics Design & Animation (Diploma)

Nov 2019 – Mar 2022 Arena Animation, Ahmedabad, Left to pursue full-time product design career
